

# HAMP CO

Supplying innovative design, multi-discipline hardware solutions and service since 1988 - **DEVELOPING PRACTICAL & ROBUST SOLUTIONS**

As we head into 2022 the new energy mix is accelerating and Hampco continues to fill niche demands in multi-discipline engineering consultancy and the design and manufacture of custom hardware solutions to support it.

## 2020 Solutions

## Our Services

concept design • multi-discipline engineering • product development  
structural analysis • FEA • CFD • 3D visualization • animation  
fabrication • manufacture • life extension • upgrades  
independent verification • surveys • inspections • construction supervision  
project personnel • FEED studies • compliance • FAT  
planning & budgets • procurement • QA/QC • certification • documentation  
refurbishment • field service

## Our Equipment

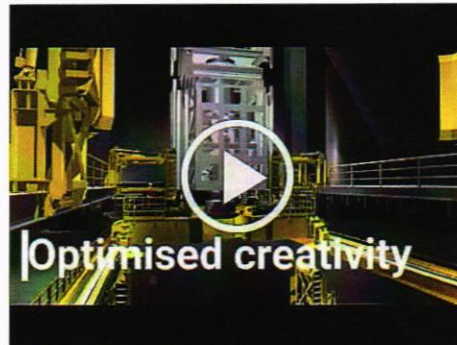

**Hampco** has supplied a wide range of custom equipment and supported its installation, operation and service internationally for over 33 years. **Hampco** has also upgraded and extended the life of existing older or obsolete equipment where the OEM no longer exists. Whatever your technical challenges, we can offer solutions based on many years of practical experience across a wide range of applications from simple structural fabrication to complete integrated modules and advanced analytical techniques.

## Our Specialities and Philosophies

**Hampco** specialities include engineering analysis & design, offshore drilling, mechanical handling, cranes, pressure containment, lifting, power & controls.

Our reputation has been built on innovation, cost-effectiveness and faster delivery than our large OEM competitors.

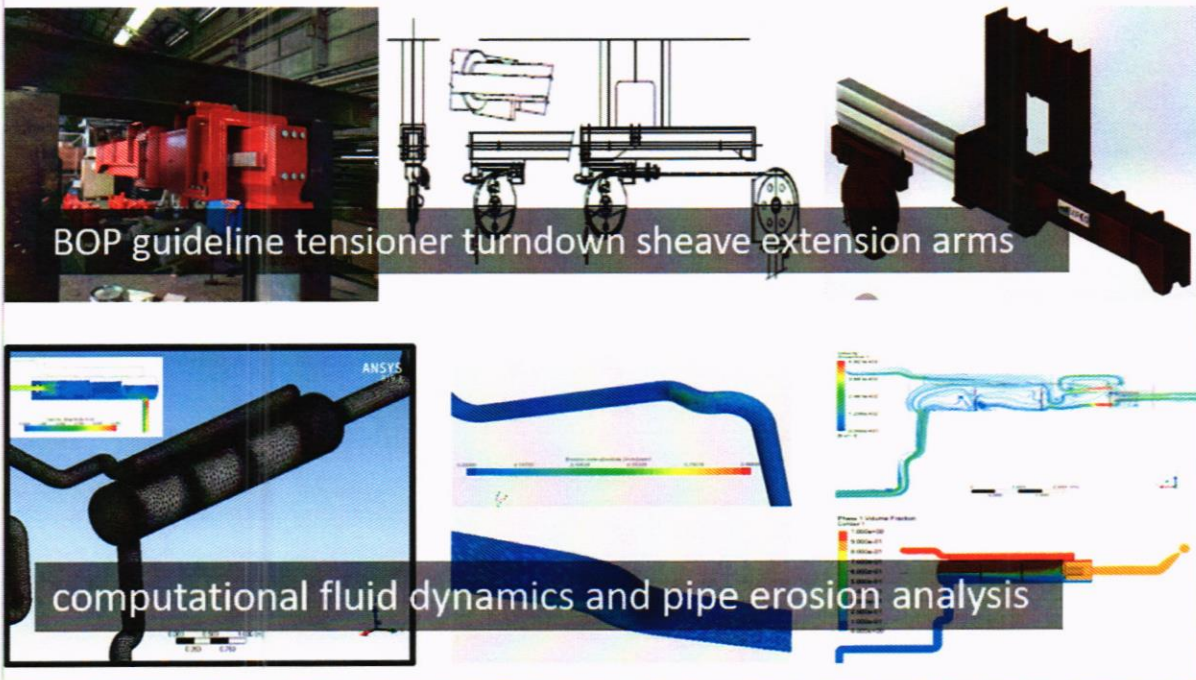

**See our capabilities in this short overview video:**

urgent design and manufacture of riser guidance system adapters

tender derrick equipment set

telescopic flare boom

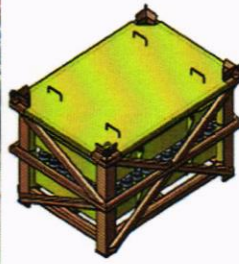

Surface BOP and handling system

riser gantry and pipe handling cranes refurbishment and upgrade

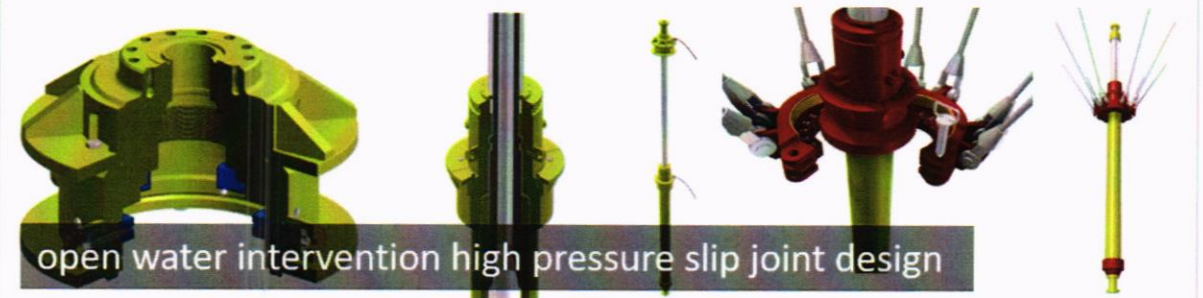

riser bolt storage boxes

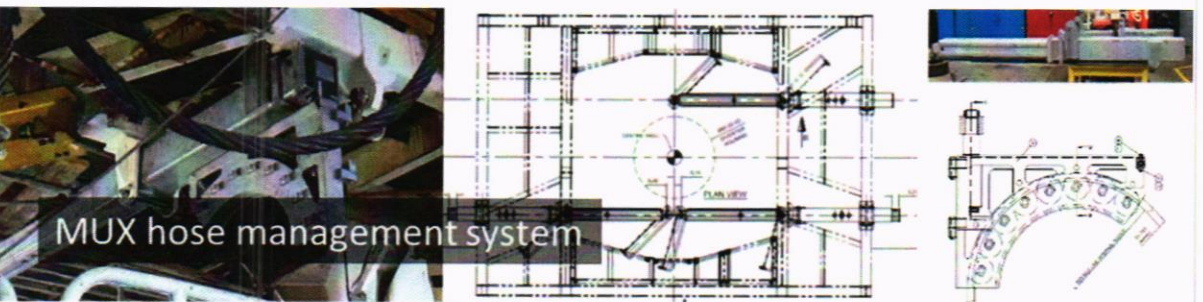

pipe handling system refurbishment and life extension

overboard tree running and splashzone guidance systems

open water intervention high pressure slip joint design

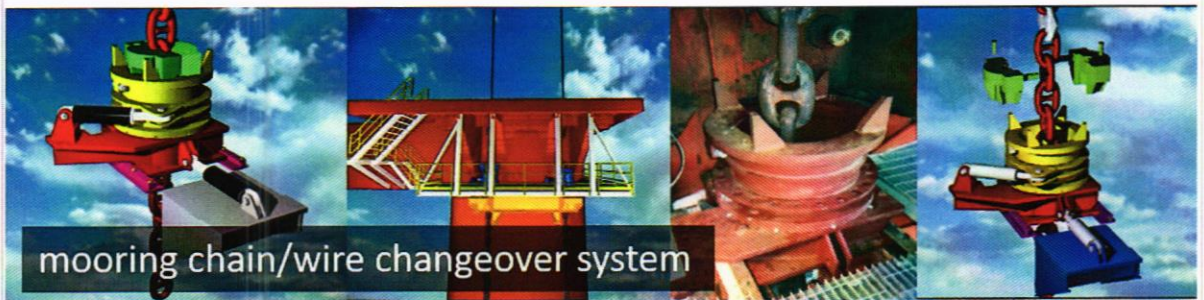

MUX hose management system

MPD hose management DNV basket design

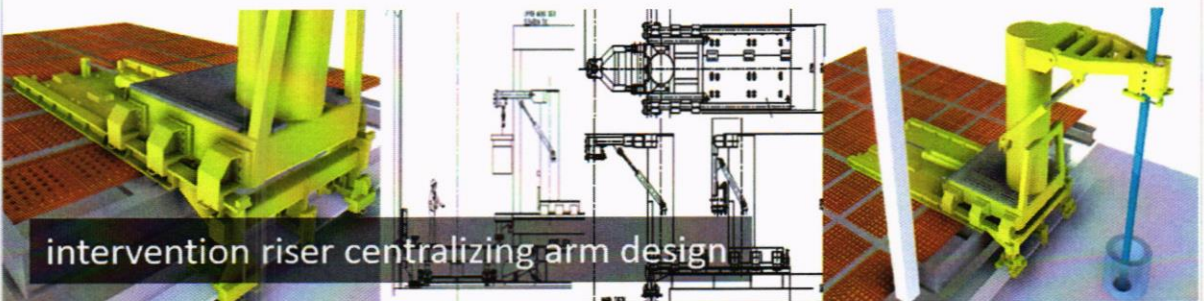

marine crane hull upgrade and installation

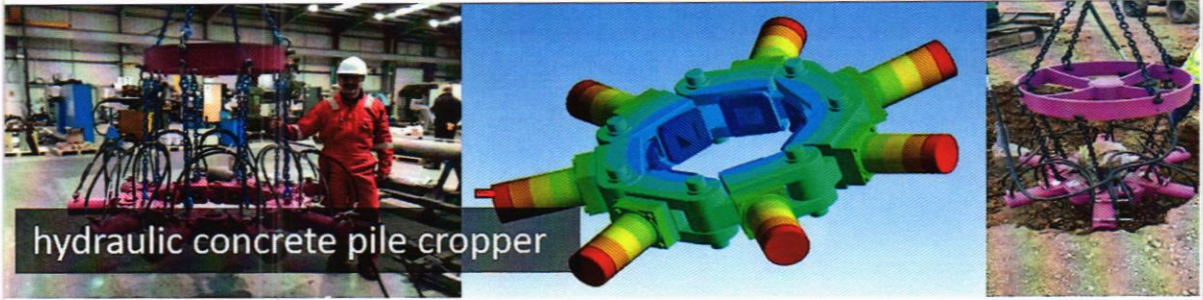

mooring chain/wire changeover system

jack-up personnel access system

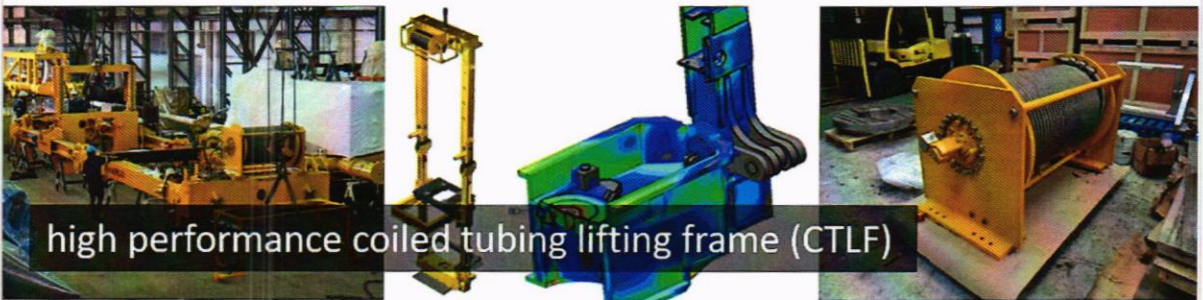

intervention riser centralizing arm design

hydraulic concrete pile cropper

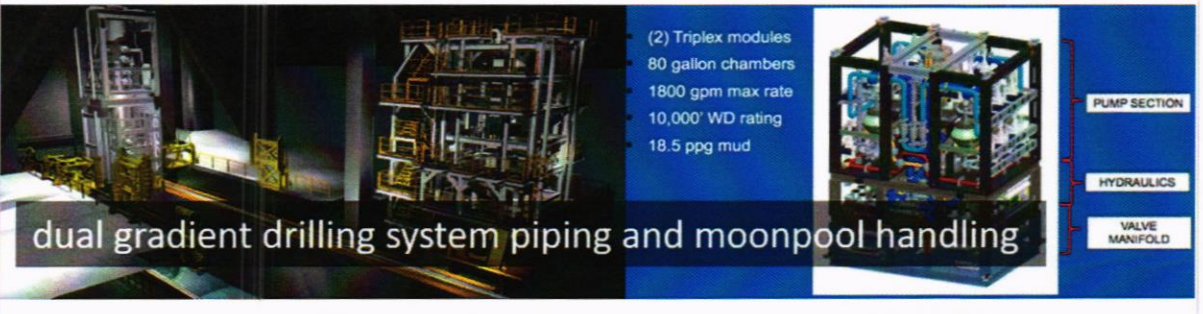

high performance slewing drillship flare booms

high performance coiled tubing lifting frame (CTLF)

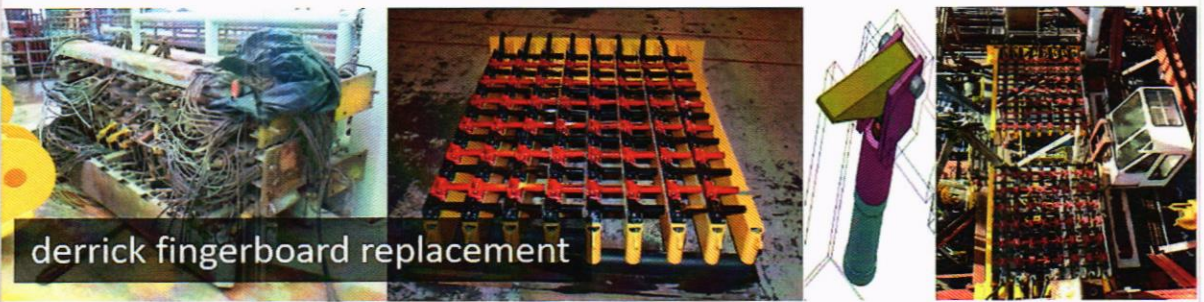

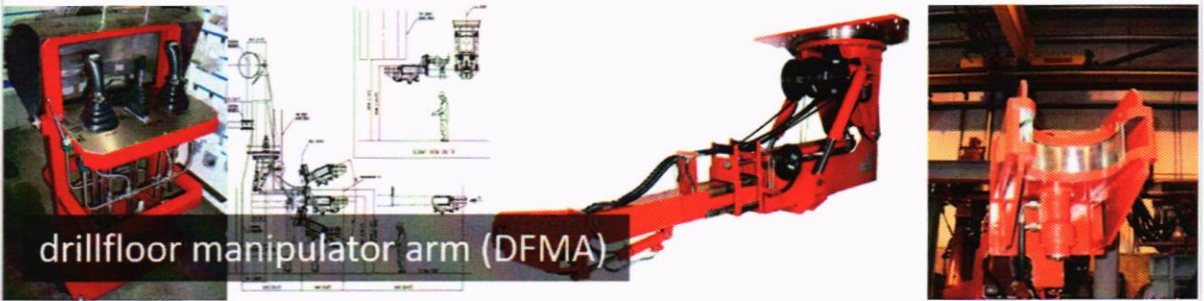

emergency towing hardware electric/manual handling winches

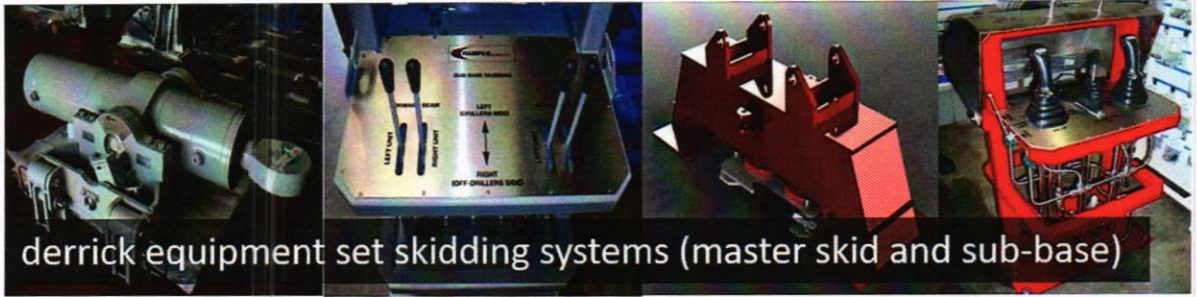

dual gradient drilling system piping and moonpool handling

- (2) Triplex modules
- 80 gallon chambers
- 1800 gpm max rate
- 10,000' WD rating
- 18.5 ppg mud

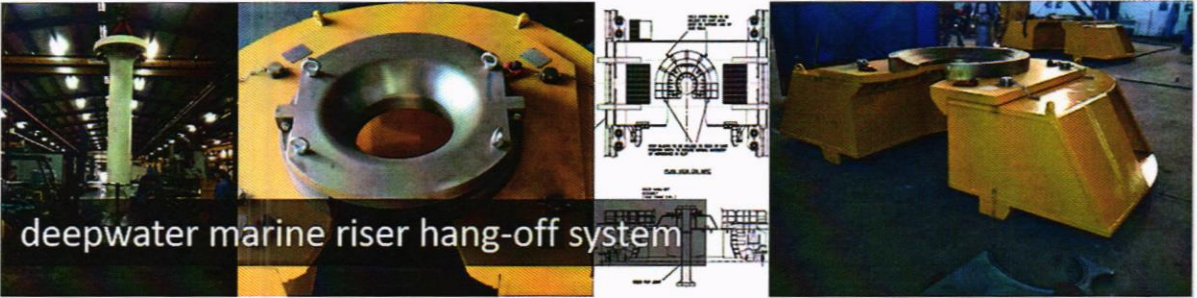

- PUMP SECTION
- HYDRAULICS
- VALVE MANIFOLD

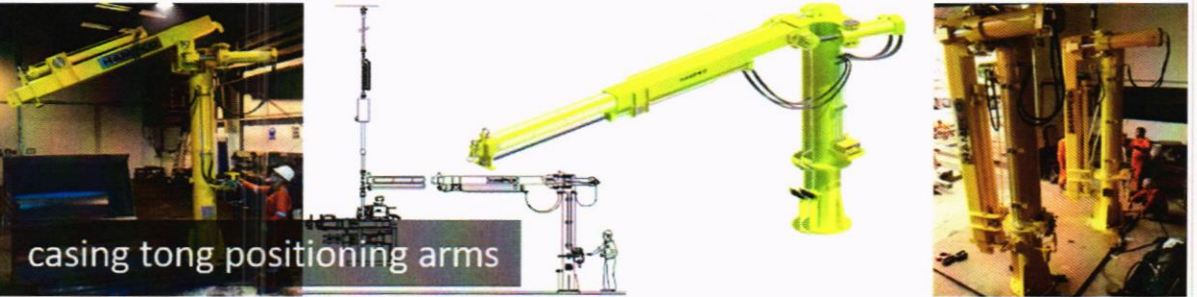

derrick equipment set skidding systems (master skid and sub-base)

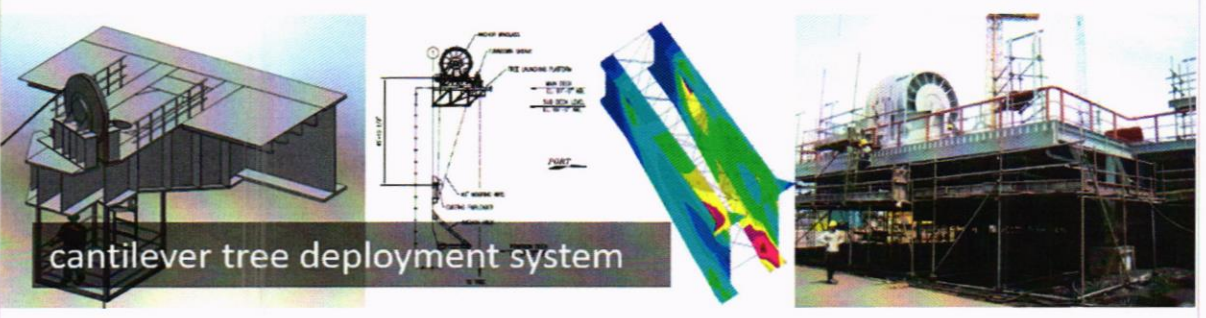

deepwater marine riser hang-off system

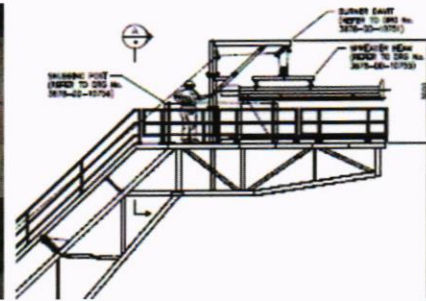

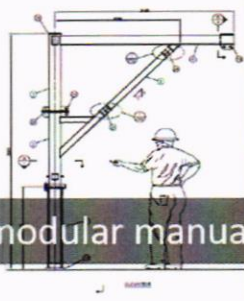

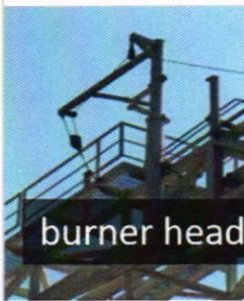

casing tong positioning arms

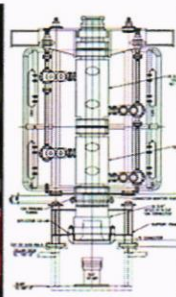

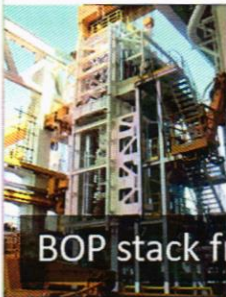

casing stabbing arm

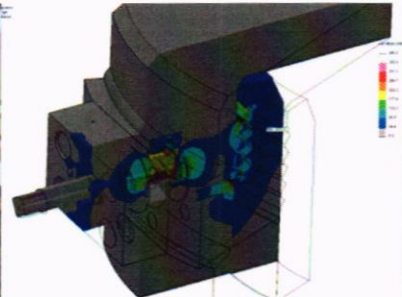

cantilever tree deployment system

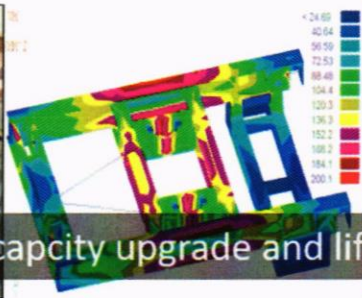

burner head modular manual handling jib

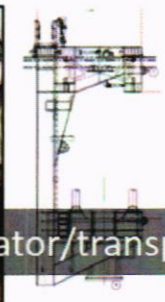

BOP stack frames and upgrades

BOP lift tool

BOP handling crane capacity upgrade and life extension

BOP elevator/transporter upgrade

1000t dual gradient drilling moonpool multi-purpose cart

1000t elevating multi-purpose moonpool transporter

Thank you for scrolling down and have a great 2022, from all at Hampco

Hampco | 35002 Cooper Road, Brookshire, TX 77423
